Take Back Program for our Institutional Customers

If you are one of our valued institutional customers, we do offer a recycling program for you when your units reach the end of their useful life. However, Planar encourages you to explore all local options to properly recycle your products first. There are many schools, municipalities and non-profits that will take your working but otherwise obsolete units for reuse. There are also many options that you can explore to recycle non-working units in your community.

If you would like to take advantage of Planar's take back program, please note that there no fee for this service as long as you package and ship the units at your expense. There will be a small fee if packaging must be sent to you first.

Please contact us at 1-866-204-3966 for an eWaste RMA and instructions on packaging and shipment of your product(s). You may also find our CED Program Application form at the website below.

For more information, be sure to visit our Electronic Waste Information page at www.planarsystems.com/green/us.
